

## ■ CLAMP BUSHINGS (DIN 1498) Plain bearings for rotating and oscillating bearing movements

### Direct delivery by manufacturer:

- All intermediate dimensions possible
- Special designs up to 25 mm wall thickness
- Various materials available.
  - Optimised to particular application case
  - Various strengths due to own heat treatment
- Flexible and short delivery times
- Economic advantage
- Special types possible:
  - Press fit
  - Locking devices (cams, studs, bars)
  - Lubrication grooves
  - Crowning
  - Arrow groove
  - Bevel groove
  - Beading
  - Collar bushings
  - Eccentric bushings

### Your advantage:

- Bushing automatically retensions if hole widens.
- Easy installation
- Low press-in forces
- No processing required after installation
- Many years of manufacturing and design experience
