

INDIVIDUAL OVERSIZE BUSHING made of MangaDur®SEAMLESS for jaw and cylinder pivot points

Direct delivery by manufacturer:

- Diameter and length of the bushing/plain bearing as specified by you or standard dimensions
- Flexible and short delivery times
- Economic advantage

Your advantage:

- No expensive restoration of the receiving boring to original dimensions but just one-time reworking of the receiving boring

Process in the past:

- Spindle milling
- Welding (detrimental heat application to steel structure)
- Spindle milling (heavy and difficult metal cutting in inhomogeneous weld metal)
- Installation of the bushing / plain bearing with original dimensions

Process in the future:

- Determination and information of the new dimensions to: info@fvt-gmbh.de or telephone +49 4956 / 40 67-0
- Reworking of the receiving boring
- Installation of the bushing / plain bearing with oversize

Many users and manufacturers worldwide are successfully using MangaDur®SEAMLESS bushings.
