

## ■ COMPRESSED AND DROP-FORGED PARTS

We manufacture compressed and drop-forged parts according to drawings in a wide variety of shapes and dimensions – including in small series. Dies and fixtures are designed and produced in our own toolmaking shop. Of course, we also deliver our products pre- and finish-machined. We process all common materials and manufacture in accordance with our customers' specifications.

### Materials & steel grades

- Carbon steels
- General construction steels
- High-grade construction steels
- Up to high-alloy tool steels and special alloys
- Manganese hard steel

### Customer specifications & working basis

- CAD data, drawing (pre- and finish-machined), delivery specification, regulations, drawings and samples

### Forging machines

- 630 t spindle press
- 270 t spindle press

### Piece weight

Piece weights up to 50 kg

### Tool making

Dies and fixtures come from our own toolmaking shop

### Heat treatment:

All common processes, like austenitising, quenching and tempering, case and inductive hardening, normalising and annealing are available.

### Machining

Parts are machined as required.
